

MARS

Hybrid Vacuum Tube Amplifier

For many years industry manufacturers have seen a shift of music users looking for instant gratification in the way they hear music. To respond to a new generation of listeners and provide new comers with an introduction to high fidelity, Dared's response was the creation of MARS, an affordable integrated amplifier featuring wireless streaming of audio to a 6N2 tube preamplifier section driving a Class A MOSFET Class A amplifier.

MARS features a built in USB DAC as well as wireless connection to Smartphones etc... A preamplifier output is available for those wishing to upgrade their current vintage audio system with a tube driven USB DAC with wireless connectivity to modern day personal devices.
